ABOUT

Full-stack software engineer working in PHP, Vue and React. Works remotely with European teams on e-commerce and business web applications, alongside a steady stream of freelance projects. Takes features from database to deployment, upgrades older systems to current PHP, Symfony and Laravel versions, and has led a development team.

SKILLS

Backend	PHP · Symfony · Laravel · Node.js · Python
Frontend & Mobile	Vue 3 · JavaScript / TypeScript · React · React Native · Tailwind CSS
Platforms	Shopware 6 · Drupal · WordPress
Database & Search	MySQL · PostgreSQL · MongoDB · Redis · Elasticsearch
DevOps & Tools	Docker · Git · CI/CD · AWS (Lambda, S3, SES, SNS, Textract) · Laravel Vapor
Testing	PHPUnit · Pest · Cypress · Playwright
Integrations	Stripe · Twilio · REST APIs
AI / LLM	OpenAI API · Claude Code · Gemini

EXPERIENCE

2017 – Present	Freelance Software Engineer – Build Shopware 6 extensions, themes and custom Elasticsearch indexes and queries. – Set up and customize complete online stores, from backend to storefront. – Integrate shops with third-party services and APIs (payment, shipping, ERP). – Also build web and mobile apps with Laravel, Node.js, React and React Native.
Mar 2023 – Present	Solio Software Engineer – Built a lead management tool for Vorwerk Austria (Thermomix) on Drupal 11: lead assignment, reminders, CSV import and SAP export. – Maintained GLS Bank's single sign-on (OAuth2, LDAP) and business account-opening app with Postident identity checks. – Built a ticketing and time-tracking tool integrated with Jira and GitLab (Symfony, API Platform). – Developed and maintained e-commerce stores for manomama and Brichbag (Shopware). – Built Elasticsearch search for Shopware and Drupal with custom indexes and queries.
Dec 2021 – Feb 2023	Shape & Shift Software Engineer – Built Shopware 6 extensions, themes and Elasticsearch search (Symfony, Vue). – Worked across all modules of a multi-tenant accounting SaaS (Laravel, Vue 3). – Wrote Python AWS Lambdas, added OpenAI and Twilio SMS, and deployed on Laravel Vapor.
Sep 2019 – Nov 2021	NFQ Frontend Developer – Built React and React Native apps for clients and proposed technical solutions for new projects.
Jul 2017 – Aug 2019	Rikkeisoft Software Engineer · Team Lead – Full-stack developer on multiple client projects, working as team lead and core developer. – Set up the team's Git workflow. – Named Promising Employee (2017) and Outstanding Employee (2018).
Sep 2016 – Jun 2017	Junoteam Software Engineer – Built websites, plugins and themes with WordPress and Symfony.
